BT 1

```
interface Mail {
  void sendMail();
  void log();
}

class MailImpl implements Mail {
@override
  public void sendMail();
   System.out.println("Sending mail...
}

@override
```

Scanned with CamScanner

```
    public void log (){
        System.out.println ("Logging mail
...")
    }
}

    public class Main{
        public static void main (String[]
args){
            Mail mail = new Mail();
            mail.sendMail();
            mail.log();
        }
}
```
